

The Water Dragon

Location: Burj Lake

“ A staggering **thirty meter long and nine meter tall**, The Water Dragon uncoils its **gigantic luminous silhouette** in The Palace Downtown Dubai Lake.

Comprised of an aluminum frame, inflatable material and recycled plastic containers, the lighting from LEDs and low energy light bulbs is bright, energy efficient and changes to match the Dragon's mood.

... and in the Water Dragon mouth, the LED screen displays symbols **of the four elements : Fire, Air, Water and Earth.** ”

A self-taught artist, BIBI's work is based on research and a reflection of the world's relationship with the environment.
